
Experimental wrapper
Frozen configuration · Provider adapter
Execution controls · Langfuse · Accounting
Separate memory store and index per cell
Frozen A-MEM workflow
with experimental action gates
Create memory note
LLM keywords / context / tags
Retrieve up to five neighbours
Shared LLM evolution decision
Runs in every configuration
Neighbour-update gate
Existing-note contexts + tags
Selected AND enabled
Strengthen gate
New-note links + tags
Selected AND enabled
Insert new note
QA from the completed memory store
LLM keywords → top 10 + links → LLM answer
Experimental evidence
Memory states · Predictions · Scores · Traces · Costs
